CITY

Lusaka, Zambia

// 01 WHO WE ARE

About Convergeo

Convergeo is a Lusaka-based technology and digital solutions company dedicated to converging modern technology with the operational realities of Zambian businesses.

We build practical, fast-to-deploy digital tools — from WhatsApp automation and custom web apps to fintech integrations and AI-powered chatbots — that help local businesses compete, grow, and serve their customers better.

Our work spans agriculture, NGOs, retail, events, e-commerce, and beyond. We have helped digitize over 30 businesses across Zambia and continue to push the frontier of what technology can do for the local economy.

OUR VISION

A Zambia where every business — from a smallholder farmer to an urban retailer — operates with the efficiency and digital presence of a global enterprise.

OUR MISSION

To deliver automation, connectivity, and custom-built technology that saves time, captures more leads, and drives measurable growth for Zambian businesses.

"We built Convergeo because we saw Zambian businesses being left behind digitally. Our mission is to change that — one automation at a time."

Core Services

// 02 WHAT WE OFFER

Our Services

End-to-end digital solutions-built specifically for Zambian businesses and organizations.

WA

Vergeo Instant-Connect

WhatsApp Automation

Automates WhatsApp inquiries directly into your CRM, Gmail or database. Ensures 100% lead capture with instant team notification. Deployed in just 3-5 days. Ideal for shops, clinics, NGOs, farms and any business that receives enquiries.

</>

Web & App Development

React | Next.js | Supabase

Custom, mobile-ready websites and web applications built for Zambian internet conditions. Fast load times, clean design and full integration with your existing tools and payment systems.

WF

Workflow Automation and Consultation

n8n | Zapier | Make

We connect your digital tools and eliminate manual, repetitive tasks. Orders, bookings, notifications, reports — automated end to end so your team can focus on serving customers.

ZK

Fintech Integration

Flutterwave | Airtel | MTN

Accept payments from Airtel Money, MTN Mobile Money, Visa, and Mastercard. We also migrate legacy payment systems (e.g. DPO) to local fintech infrastructure with zero transaction drop-off.

SS

SaaS for Niche Markets

Purpose-Built Platforms

We design and build Software-as-a-Service platforms for underserved Zambian industries — from agricultural inventory tracking and NGO donor management to event ticketing and vendor marketplaces.

AI

AI Chatbot Integration

Website | WhatsApp | Facebook

Intelligent chatbots that handle FAQs, capture leads, and route enquiries 24/7 across your website, Facebook page or WhatsApp. Never miss a customer inquiry — even at 2am.

// 03 OUR PROCESS

How We Work

A clear, proven 4-step framework—from first conversation to live solution.

01

—

02

—

03

—

04

DISCOVER

We begin with a thorough consultation to understand your business, your customers and the specific problems you need solved. No assumptions — just listening and learning.

DESIGN

We map out the right solution: what to build, what to integrate and how it connects to your existing operations. You approve the plan before we write a single line of code.

DEPLOY

We move fast. Most solutions are live within 3-10 business days. We handle all technical setup, testing and staff onboarding so the transition is seamless for your team.

OPTIMISE

After launch, we monitor performance, gather feedback and iterate. Our goal is long-term results — not a one-time delivery. We are your ongoing digital partner.
